

## Your personalized Dashboard in the Doghouse

- ✓ Digital Gauges
- ✓ Centre Radial Gauges
- ✓ Top Radial Gauges
- ✓ Strip Charts (Depth/Time-based)
- ✓ Horizontal Charts
- ✓ Barton Charts
- ✓ Alarm Indicators
- ✓ Well bore diagrams
- ✓ Horizontal/Vertical Bar Meters

+ customize your own **dynamic** charts, gauges, and diagrams

Welldaq Electronic Data Recorder (EDR) is a state-of-the-art data acquisition and logging dashboard.

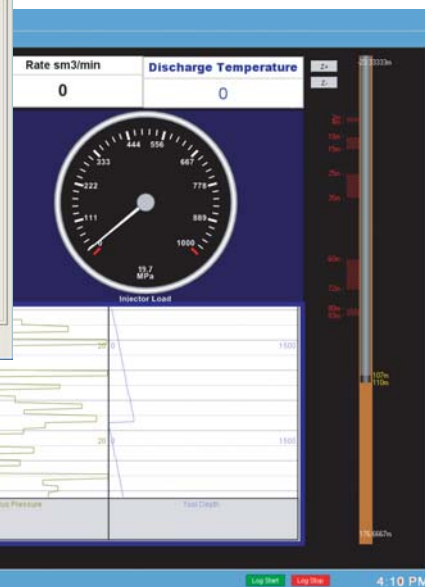

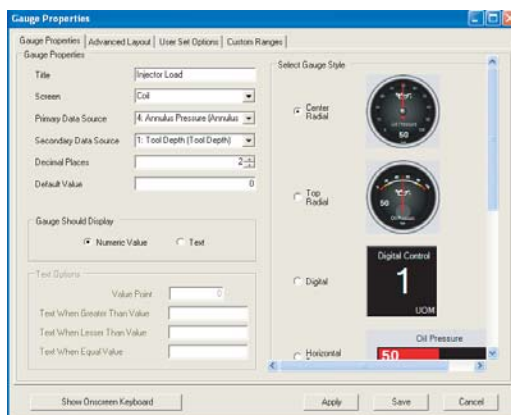

The software connects directly to your PLC and logs all incoming well data for archiving and transmission.

## Replication Across the Lease

Share your incoming data with clients and supervisors by allowing them to connect **wirelessly** via laptop or tablet PC. They can monitor real-time data on the lease and configure screens to their own taste using Welldaq config files.

## Create your Own Screens

Multiple screens can be dynamically created and modified on the fly. You can personally CLICK, DRAG, and customize screens to display an array of gauges, charts, and diagrams WHILE THE JOB IS RUNNING.

## Powerful Reports

Export all of your log and job data through Welldaq Job Data File and create reports, tour sheets, and more. Give your on-site staff the power to drive data and payroll information to your front office.
